CONSULTING AND TECHNICAL STUDIES

We offer consulting and technical studies services pertaining to technical information technology for corporations and investors in the field of information technology through academic hands with extensive experience in the field of information technology, Internet and particularly in its investments. Thus enabling corporations and establishments in developing and administrating computer departments to computerize and organize their business in a modern and structured manner, which is reflected in the double profits and saving significantly wasted time.

COMPUTER NETWORKS AND COMMUNICATIONS EXTENSION AND MAINTENANCE

We perform all work in installing internal networks for establishments and corporations, whether wired or wireless; as we prepare internal servers to serving staff communication within the company and its foreign branches.
SHAP provides Network establishment and installing service of both types wired (LAN) and wireless (WLAN) at the hands of academic specialists with extensive experience in networking andcontrol.
Moreover, SHAP provides all hardware pieces needed to construct networks in companies and business establishments within the best specifications.

E-COMMERCE

We deliver tailor-made ecommerce solutions for established retailers. From strategy and creative through to technical architecture, implementation, quality assurance and ongoing hosting and support – we work collaboratively with clients to provide the bvest possible experience, advice and skills to ensure the right results for your business.

SOFTWARE WHOLESALE

We offer:
Desktop and laptop rollout programs, Break/fix services, Configure-to-order systems, Server and rack configurations, Logistics services, And more...

SOFTWARE ANALYSIS, PROGRAMMING & MAINTENANCE.

We believe that professional maintenance and support is the right way to reduce software system and ensure useful improvements and optimization steps. This is not only about availability of single units and modules it is about making sure that the entire IT-infrastructure is cost-effective and runs smoothly and reliably.

# WEBSITE DESIGN AND DEVELOPMENT

We offer our integrated services in the design and development of websites in accordance with the latest available techniques, as SHAP seeks to keep up with the latest developments and techniques for constructing websites, which makes our clients in the advanced position through websites that represent them in the best representation on the Internet and contribute to service their clients.
